

**ART 109 GARY MESA-GAIDO ASSIGN.#1 "Email Me"
(Using an Internet browser to manage email accounts)**

In this first assignment I simply want to hear from you. This assignment is designed to help you become familiar with the email system at MSU. I want you to use and become very comfortable with this email system, for we will be using this system all semester long to communicate back and forth to one another. I will be sending you 2 stories that I want you to read and reply to. Pick one of the two and write back to me using MSU's email software found on the university's web site. I want you to tell me what you think about one of the 2 emails that I send you. How did it make you feel? Had you read about this before? Does it have any implication for you as a student or person in general? Did the story impact you in any way? Did it make you want to find out more about the author or subject matter? These are examples of question you may ask yourself after reading the email. I want at least a paragraph of reply. Do just say you read it and it was good or bad, show me in the reply that you did indeed read and think about what i sent you. This should be an easy A for all of you, so just do as I ask. This should help with your comprehension of the email system. I want you to get used to using this system even if you have an email account through hotmail or yahoo. I will be send grades, announcements and other important information to your MSU email account so it is most important that you use it on a daily basis.

Due date: Will be given in class.
